The Canadian Association on Gerontology (CAG) is a national, multidisciplinary scientific and educational association established to provide leadership in matters related to the aging population. A registered Canadian charity, the CAG was founded on October 15, 1971 and is a member of the International Association of Gerontology and Geriatrics.

Our Vision: To be the Canadian authority on individual and population aging.

Our Mission: The Canadian Association on Gerontology seeks to improve the lives of older Canadians through the creation and dissemination of knowledge in gerontological policy, practice, research and education.

Our membership is a dynamic mix of people interested in the field of gerontology including health care professionals, researchers, academics, administrators, government representatives, national organization executives, students and seniors.

CAG members receive a discount on conference registration, in addition to other member benefits.

PRIME MINISTER • PREMIER MINISTRE

October 20, 2016

Dear Friends:

I am very pleased to extend warm greetings to everyone attending the 45th Annual Scientific and Educational Meeting of the Canadian Association on Gerontology.

The demographic changes linked to increased life expectancy provide much food for thought on the impact of our aging population. More and more Canadians are living longer, and we need to provide conditions conducive to their autonomy and productivity. The theme of this year's meeting, "Fostering Innovation in Research on Aging," offers a wonderful opportunity for participants to learn about the latest progress in the gerontology field and to contribute innovative solutions to related issues. I am sure the meeting will help to enhance your knowledge within a framework that fosters education, dialogue and debate.

On behalf of the Government of Canada, I wish you a most enjoyable and productive annual meeting.

Sincerely,

The Rt. Hon. Justin P. J. Trudeau, P.C., M.P.
Prime Minister of Canada

Minister of
Families, Children and Social Development

Ministre de
la Famille, des Enfants et du Développement social

Ottawa, Canada K1A 0J9

I would like to welcome the delegates participating in the 45th Annual Scientific and Educational Meeting of the Canadian Association on Gerontology.

This year's annual meeting, with the theme "Fostering Innovation in Research on Aging," brings together experts, scientists, researchers, academics, individuals, and governmental and non-governmental organizations, all with a common purpose and goal—to improve the lives of older Canadians. I understand this conference to be a wonderful opportunity to meet new colleagues, develop or strengthen working partnerships, exchange ideas and practices, and share successes, challenges and lessons learned, in the field of gerontology. I wish I could have joined you for your discussions.

The Government of Canada is committed to strengthening the middle class and helping low-income Canadians move from poverty to opportunity. We believe that Canada is at its best when all citizens are treated fairly and have the opportunity to reach their full potential—including seniors, who make valuable contributions to our society. Through Budget 2016, we are investing in the well-being of older Canadians. These investments will change the lives of seniors, both now and in the future, by addressing income security, social inclusion, poverty, affordable housing and seniors facilities, as well as by providing more generous and flexible leave for caregivers.

Helping seniors live longer and healthier lives is crucial in our aging society. As researchers, policy makers and visionaries, your multidisciplinary work, and the passionate dedication with which you carry this out, contribute immensely to the well-being of Canadian seniors. Your work is at the heart of our collective effort towards making real change in the lives of older Canadians.

It is with utmost respect and humility that I thank you for the work you do. Together, we can improve the lives of Canadians, young and old.

This conference is sure to be very interesting and productive.

The Honourable Jean-Yves Duclos, P.C., M.P.

Message du premier ministre

Le vieillissement de sa population est sans conteste l'un des enjeux majeurs auxquels la société québécoise est actuellement confrontée. Le phénomène touche l'ensemble des secteurs d'activité, que l'on parle de santé, de services sociaux, de liens intergénérationnels, d'évolution dans les valeurs, d'adaptation des services ou des infrastructures. De toute évidence, c'est notre façon d'envisager la vie en société qui doit être revue et adaptée aux nouveaux besoins qui émergent.

Déjà, plusieurs actions ont été entreprises pour offrir à cette frange de plus en plus importante de la population les meilleures conditions de vie possible, mais il nous faut également nous doter d'une vision d'ensemble pour être en mesure d'envisager le phénomène et ses retombées dans leur globalité.

Dans cette perspective, le Gouvernement du Québec sait qu'il peut compter sur les avis éclairés de l'Association canadienne de gérontologie pour soutenir sa réflexion et accompagner la société québécoise dans le processus menant à une nouvelle étape de son évolution. Je salue donc votre travail et vous souhaite une journée d'échanges fructueux.

Philippe Couillard

The ageing of its population is certainly one of the key challenges that Québec society is facing. The phenomenon affects all areas of activity, including health, social services, intergenerational bonds, changing values, and the adaptation of services or infrastructure. Obviously, we must revise and adapt our perception of life in society to the new needs that are emerging.

A number of initiatives have already been implemented to offer this growing segment of the population the best possible living conditions. However, we must also adopt a comprehensive view in order to grasp the phenomenon and its overall impact.

In this perspective, the Québec government knows that it can rely on the expert advice of the Canadian Association on Gerontology to support its reflection and guide Québec society in the process leading to a new stage in its development. I would like to pay tribute to your efforts and extend my best wishes for productive exchanges.

Message du scientifique en chef

L'un des grands défis de société que le Québec doit relever est celui du vieillissement de sa population, qui est l'une des plus âgées de la planète. Les récentes données de l'Institut de la statistique du Québec démontrent que la part des 65 ans et plus passera de 16 % en 2011 à 25 % en 2031, et à 28 % en 2061. Un tel phénomène, qui ne cesse de s'accélérer, exerce une pression sur l'ensemble des services publics et touche différentes sphères d'activité, les communautés et les familles.

Pour comprendre le vieillissement dans toutes ses dimensions, la recherche est incontournable. Les décideurs publics peuvent compter sur l'excellence de la communauté scientifique québécoise pour mieux comprendre les tenants et aboutissants d'un tel phénomène. Par les résultats de leurs travaux, les chercheurs proposent des analyses et pistes de solution, voire stimulent l'innovation technologique, médicale et sociale pour le mieux-être de nos aînés, d'aujourd'hui et de demain.

Un organisme comme l'Association canadienne de gérontologie joue un rôle important dans la mise en valeur des résultats de la recherche et des politiques, et en matière d'éducation, afin de favoriser de bonnes conditions de vie des personnes âgées au Canada. Que cette 45^e réunion annuelle soit porteuse d'idées et d'échanges fructueux.

Among the major social challenges faced by Québec is the ageing of its population, which is one of the world's oldest. Recent data released by the Institut de la statistique du Québec reveal that the segment of the population aged 65 and older will increase from 16% in 2011 to 25% in 2031 and 28% in 2061. This growing phenomenon exerts pressure on our public services and impacts different spheres of activity, communities and families.

Research is critical to understanding ageing in all its aspects. Policy-makers can rely on the excellence of Québec's scientific community to better grasp the particulars of the trend. Through their results, researchers set out analyses and potential solutions, stimulating technological, medical and social innovations, to ensure the wellbeing of our seniors, today and tomorrow.

Organizations such as the Canadian Association on Gerontology play an important role in education and the development of research and policy results to foster good living conditions for Canadian seniors. This 45th annual meeting should lead to new ideas and rich exchanges.

Conference Greetings and CAG2016 Scientific Committee

Greetings from the President of CAG

Welcome to the 45th Annual Scientific and Educational Meeting of the Canadian Association on Gerontology (CAG)! I am delighted that you have taken time out of your busy schedules to join new and long-time colleagues for the opportunity to expand your knowledge, establish new collaborations and celebrate gerontology in Canada. I also want to acknowledge and extend a warm welcome to the CAG's Student Connection members, our forthcoming gerontologists in training.

This year, the conference is hosted in partnership with the Réseau Québécois de recherche sur le vieillissement with Drs. Pierrette Gaudreau and François Béland as co-chairs of the Scientific Committee. On behalf of all of us who will benefit from this conference, I want to thank the Scientific Committee as well as Dr. Anthony Lombardo, Executive Director of the CAG and his team, for their months of concerted planning and preparation.

The theme of this year's meeting, Fostering Innovation in Research on Aging underlines the importance of novel inquiry to advance knowledge, shape practice and policy while emphasizing the importance of interdisciplinary approaches to understanding and improving the experience of growing older in today's society. The keynote speakers are experts in topics such as the biology and genetics of aging, caring roles and transitions of older adults and they will relate this evidence into practice and policy in the social sciences, humanities and clinical disciplines.

From October 20-22, over 650 stakeholders – researchers, practitioners, policy-makers, community members, students and other highly qualified personnel (HQP), in the field of aging, are convening to shape the future of gerontology in Canada. Our conference is the only event in aging in Canada to provide an explicit platform to share multidisciplinary inquiry in gerontology. The CAG's yearly meeting is a testimony that population aging transcends academic boundaries.

I encourage you to take advantage of all that the conference has to offer including the pre-conference workshops, the three keynote addresses, the formal and informal networking events and the over 600 oral, poster and symposium presentations. I know that you will find the next few days to be both educational and enjoyable and I look forward to sharing great conversations with you. On behalf of the CAG Board of Directors, I extend best wishes to all attendees for a most pleasant time in Montréal.

CNFS-Université de Moncton, President, Canadian Association on Aging

Greetings from the Conference Co-Chairs

As co-chairs of the 45th Annual Scientific and Educational Meeting (ASEM) of the Canadian Association on Gerontology (CAG) and in the name of the Scientific Committee, we have the great pleasure to welcome you to Montreal.

This meeting is organized in partnership with the Quebec Network for Research on Aging/ Réseau Québécois de Recherche sur le Vieillessement (RQRV) and the theme "Fostering innovation in aging research" was chosen. It reflects the importance of rethinking our conceptual frameworks and methodologies in this broad area of research. We must propose innovative multidisciplinary and intersectoral approaches that will provide the necessary evidence-based data to meet the increasingly diverse needs of the aging Canadian population.

We are honored to welcome three internationally renowned prestigious speakers, Dr. Nir Barzilai of the Albert Einstein College of Medicine (NY, USA), Professor Sue Yeandle of the Department of Sociological Studies, University of Sheffield (Sheffield, UK) and Professor Deborah van den Hoonaard of the Department of Gerontology, St. Thomas University (Fredericton, CA). They will address in turn innovation in aging research from a biomedical, technological and social perspective.

This 45th ASEM of CAG offers a unique opportunity to share your latest discoveries and your proposals for actions and innovative interventions with partners from several disciplines and fields of research in aging. We hope that these exchanges will allow you to initiate new collaborations with researchers, practitioners, managers and policy makers, without forgetting our students forming the next generation of leaders in the field of aging. We hope that these exchanges will allow you to initiate new collaborations with researchers, professionals, managers and decision-makers and our students who represent the next generation of leaders in the field of aging.

We also added a touch of innovation in social activities and we invite you to participate in large numbers. We hope you will be pleasantly surprised!

Individuals who are presenting in symposia or oral paper sessions are required to bring their presentation on a USB key to their designated rooms 5 minutes before their presentation to upload their presentations.

SC-CÉ Media Resource Display Fundraiser (Formerly the Student Book Display)

Organized by the Student Connection-Connexion Étudiante (SC-CÉ) of the Canadian Association on Gerontology (CAG), the SC-CÉ Media Resource Display Fundraiser invites delegates to purchase tickets for a chance to win one of our donated books or DVDs. This year our fundraiser includes resources in both French and English. Raffle tickets are on sale during conference breaks for \$2.00 each or three for \$5.00 until 1:30 pm on Saturday, October 22nd. The names of the winners are drawn and posted on Saturday afternoon. Raffle winners can come to the display table to pick up their choice of book or DVD starting at 2:30 pm on Saturday, October 22nd. All proceeds directly support the SC-CÉ and its members. Come out and support the student members of CAG!

Student Poster Competition

The CIHR Institute of Aging is sponsoring the poster competition for graduate and post graduate students. A \$500 prize will be awarded by the Institute of Aging in each of the following categories: Master's, Doctoral and Post Doctoral Fellow.

The winners will be announced during lunch on **Saturday, October 22nd**. All candidates are expected to attend. Awards will be presented by the CIHR Institute of Aging.

Posters are judged with students in attendance by three judges on the following criteria:

1. Quality of the Research (clarity of theoretical perspectives, method, sample, findings, discussion, limitations)
2. Merit of the Research (validity of conclusions, relevancy to field of aging, potential for application)
3. Quality of Abstract and Content (coherence, logical flow, grammar, spelling, concise abstract)
4. Demonstrated Understanding of the Student (recognition of limits of the study, familiar with research context)
5. Special Merit marks will be awarded for innovative, novel research projects.

Established on July 1, 1982, the Centre's vision and mission are "To be a recognized leader in interdisciplinary research in its application to aging, to improve the lives of older adults, their caregivers and families, and to enhance communities within and outside of Manitoba. The Centre on Aging conducts, stimulates and promotes research on aging, provides an interdisciplinary focus for the research activities in aging at the universities in Manitoba, and supports the education of students in aging. The Centre serves as the focal point for the integration and dissemination of research on aging in Manitoba.

Occupational Science
& Occupational Therapy
UNIVERSITY OF TORONTO

University of Toronto, Department of Occupational Science and Occupational Therapy

The Department of Occupational Science and Occupational Therapy at the University of Toronto is dedicated to leadership and has been ranked among the top three programs in North America. This department was the first of its kind for the nation and has produced many of the professions most prominent leaders in education and practice. The role of occupational therapists with older adults particularly in the area of well elderly and fall prevention is supported by strong evidence.

University
of Victoria
Institute on Aging
& Lifelong Health

University of Victoria, Institute on Aging and Lifelong Health

The Institute on Aging and Lifelong Health is a multidisciplinary research facility at the University of Victoria. Under the direction of Scott Hofer, we support research and training on lifelong processes that influence health and aging-related outcomes. Our growing mandate is to understand modifiable lifestyle and contextual factors that influence aging and health outcomes later in life. Our work ensures consistent ongoing translation of relevant research findings into practical knowledge, services and products.

Murray Alzheimer Research
and Education Program

University of Waterloo, Murray Alzheimer Research and Education Program

For over 20 years the Murray Alzheimer Research and Education Program (MAREP), at the University of Waterloo, has been integrating research and education to improve dementia care practices in Canada and around the world.

MAREP has been recognized for its unique authentic partnership approach, working closely with people living with dementia, family members and formal care partners in the creation of practical resources and tools to support and enhance the well-being of all those in the circle of care.

How to Die Young at a Very Old Age?

Nir Barzilai, MD

Albert Einstein College of Medicine

Dr. Barzilai is a chaired Professor of Medicine and Genetics and the Director of the Institute for Aging Research at the Albert Einstein College of Medicine, which is currently the biggest Center in the world to study the Biology of Aging. This Institute is the home of the Nathan Shock Center of Excellence in the Biology of Aging and the Glenn center for the Biology of Human Aging. His interests focus on several basic mechanisms in the biology and genetics of aging. He is the recipient of an NIH a Merit Award aiming to extend the healthy life span in rodents by biological interventions. He also studies families with centenarians that have provided genetic/biological insights on the protection against aging. Several drugs are developed based, in part, on these paradigm-changing studies. He is a recipient of numerous prestigious awards, including the recipient of the 2010 Irving S. Wright Award of Distinction in Aging Research. Dr. Barzilai is in the board of the American Federation for Aging Research, is its co-scientific director, and has served on several NIA study section. He is also a founder of CohBar Inc., a biotech that develops mitochondrial derived peptides as therapy for aging and its diseases. He is co-PI on the R24 Geroscience (Apollo) grant that is an effort to move the field of aging to translation. He is leading the TAME (Targeting/Taming Aging with METformin) multi central study. His work has been profiled by major outlets, including the New York Times, the BBC and PBS' NOVA science now, TEDx talk Science and is the leading feature on the Ron Howard/Jonathan Silberberg/National Geographic film about the Age of Aging.

Connecting People and Systems: What Role for Technology in Caring and Ageing Well in Later Life?

Sue Yeandle, PhD

*Department of Sociological Studies
University of Sheffield*

Sue Yeandle is Professor of Sociology and Director, CIRCLE (Centre for International Research on Care, Labour & Equalities), University of Sheffield, UK. Her research focuses on policies and practices which affect caring roles throughout the life course and includes carers and their support needs; the paid care workforce; the role of technology in systems of care and support; and comparative international analysis of policy on care, carers and caring. Sue led AKTIVE, a UK academic-industry collaboration on telecare use by older people and its impact on those caring for them, in 2011-14.

Sue is Editor-in-Chief of the International Journal of Care and Caring, a new journal being launched by Policy Press in 2017. She was ARK Atlantic Philanthropies Fellow, Queens Belfast and Ulster Universities in 2015, has held visiting positions in Australia, Canada and Finland, and is a partner in the SSHRC-funded project Gender, Migration and the Work of Care, University of Toronto. Sue participated in the UK Government's Task and Finish Group on Carers in Employment, 2012-13; advised on the Prime Minister's Review of the National Carers' Strategy, 2007-08, and was Special Adviser, House of Commons Work and Pensions Committee Inquiry on Carers, 2007-08.

Sue's recent publications include Combining Paid Work and Family Care: policies and experiences in international perspective (2013, Policy Press, ed. with T Kröger) and the AKTIVE working papers: www.aktive.org.uk. Her next book, Making Caring Matter: the mobilisation of carers and its impact on policy-making around the world, is due in 2018.

In Their Own Words: Discovering Widowhood through Qualitative Research

Deborah van den Hoonaard, PhD
Gerontology Department, St. Thomas University

Dr. Deborah K. van den Hoonaard is a sociologist and professor in the Gerontology Department at St. Thomas University in Fredericton, NB, Canada. Former Canada Research Chair in Qualitative Research and Analysis, she directed the Atlantic Centre for Qualitative Research and Analysis from 2006-2015. She is the Social-Science Editor of the Canadian Journal on Aging.

Dr van den Hoonaard's research focuses on the transitions people experience as they age, particularly women's and men's experiences of widowhood and baby-boomer women's entry into retirement. Her approach recognizes that people are experts in their own lives and, therefore, invites research participants to explain their experiences in their own words and to focus on what is important to them.

She is the author of *Qualitative Research in Action: A Canadian Primer* (2012, 2015 Oxford University Press), *By Himself, The Older Man's Experience of Widowhood* (2010, University of Toronto Press), and *The Widowed Self: The Older Woman's Journey through Widowhood*, published in 2001 by Wilfrid Laurier University Press. She is currently writing new book based on research with a more recent cohort of widows. Van den Hoonaard regularly talks to community groups and the media about her research.

In partnership with her husband, Deborah van den Hoonaard has studied the experiences of Iranian Bahá'í refugees in Atlantic Canada. Together, they have authored *The Equality of Women and Men: The Experience of the Bahá'í Community of Canada*, which was published in 2006 and *Essentials of Thinking Ethically in Qualitative Research* (Left Coast Press, 2013).

Managing transitions in housing older Canadians: Implications on the housing market

Sponsored by the Canada Mortgage and Housing Corporation

Salle de bal de Montréal

The number of seniors in Canada is growing and forming a larger proportion of the total population. This will have a significant impact on the housing market and on how we respond to the housing needs of our aging population. Drawing on research from Canada Mortgage and Housing Corporation (CMHC), presenters will provide an overview of the research available to help guide senior's housing proponents in making informed decisions and in influencing the market in response to seniors' housing issues.

CMHC's regional Senior Market Analyst will share results from the latest Seniors' Housing Survey and will also present demographic and economic trends which impact the seniors housing market.

Knowledge Transfer Consultant, René Babin will discuss the principles of Universal Design and how they can be applied in the home to make them more adaptable and accessible, thereby responding to the needs and preferences of our aging population to "Age in Place."

Georgia Remond is the Executive Director of Saint Patrick Square, a Montreal non-profit apartment community designed for autonomous seniors. Georgia will discuss the changing demographics of an ageing population and how Baby Boomers are shifting the landscape and lifestyle of traditional retirement.
